

CHARTERED FINANCIAL DATA SCIENTIST (CFDS®)

There is no way around it: big data just keeps getting bigger. The numbers are staggering, and they are not slowing down. There are 40x more bytes of data than there are stars in the observable universe. But how can we effectively use this amount of data for our purposes? Especially the financial sector is thoroughly observing "Big Data" for benefits. This program aims to introduce finance professionals into "Machine Learning" and its potentially endless opportunities which arise when insights scientifically extracted from big data are empowering financial market participants.

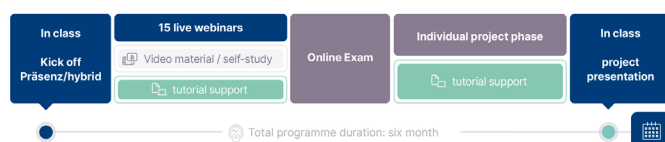

CONTENT

- ◆ Introduction: Data Science
- ◆ Exploratory Data Analysis
- ◆ Multiple Linear Regression and Related Topics
- ◆ Models with Binary Dependent Variables
- ◆ Time-Varying Volatility and the Likelihood of Extreme Loss Events
- ◆ Smoothed Bootstrap
- ◆ Statistics with Python
- ◆ Introduction to Machine Learning
- ◆ Introduction to Python and ML Libraries
- ◆ Supervised Learning and Logistic Regression in Python
- ◆ Unsupervised Learning and K-Means in Python
- ◆ Neural Networks and Deep Learning
- ◆ Convolutional Neural Networks
- ◆ Recurrent Neural Networks and Long Short Term Memory
- ◆ Natural Language Processing
- ◆ Transformers
- ◆ Reinforcement Learning
- ◆ Data Centric AI
- ◆ AI Canvas

TIMESTRUCTURE

The CFDS program consists of 2 in-class blocks. One Kick off at the beginning and a presentation at the end. In between you will have 15 live webinars as well as video material for your self-study. (Study time: approx. 145 hours).

This knowledge in financial data science will be subject to a one hour multiple choice exam.

FLEXIBLE LEARNING: PRESENCE/HYBRID

With live stream on the attendance days

All students passing that exam will then start a seven weeks project work, that means analysing a real or fictive data set using Python. The results of the project work will be presented in a in-class closing session.

TARGET GROUP

Managers and employees from the following segments

- ◆ Data Analytics
- ◆ Data Management
- ◆ Risk Management
- ◆ Marketing/Sales
- ◆ Trading
- ◆ Compliance/Regulation
- ◆ IT
- ◆ interface product management/ project management and IT

The program will be conducted in cooperation with AZEK, SFAF and AIAF.

The in class can take place in Zurich or Frankfurt.

SOCIÉTÉ FRANÇAISE
DES ANALYSTES
FINANCIERS

Associazione Italiana
per l'Analisi Finanziaria

Study Location
PRESENCE/HYBRID,
FRANKFURT

Duration
2 in-class blocks one
at the beginning one
and the end
6 MONTHS
